### Electricity prices for EU households on 1 July 1997: downward trend

These comments are based on prices collected by EUROSTAT expressed in national currency. For the comparative tables and the graphics, prices in ECU and purchasing power standards (PPS) have been used.

A study of the variations in deflated (all taxes included) electricity prices from 1 January 1997 to 1 July 1997 reveals that in most locations<sup>1</sup>, price drops took place in every standard consumer category<sup>2</sup>.

The greatest drops affected prices in France (between -3.9% and -1.8%) and in the United Kingdom (between -4.8% and -2%).

The greatest rises were recorded in Ireland (between +0.8% and +2.6%) and in Sweden (between +0.6% and +2.5%).
